

PRESENTATION

This course is dedicated to DocDokuPLM platform users. It covers all the application modules:

- **DocDokuDM** (Document Management), to organize, search, classify documents
- **DocDokuCM** (Change Management), for managing processes and change requests
- **DocDokuPM** (Product Management), product structure management, bill of materials, baselines, product configurations...
- **DocDoku3D**, to visualize and share products' Digital Mock-Up inside the browser
- **DocDokuRT** (Real Time), to bring collaboration features across all the application: chat, video-conference, presence indicator, notifications
- **DPLM**, cross-platform companion tool (Windows, Mac, Linux) bridging the gap between CAD & productivity software and DocDokuPLM

La formation, centrée sur l'usage du logiciel, comportera à la fois des phases théoriques et des phases pratiques où les stagiaires seront mis en situation sur des cas concrets réalistes.

CONTENU

Introduction

DocDokuPLM presentation
A PLM (Product Lifecycle Management) for which purposes?
Modules walkthrough

Generalities and first steps

Workspace entity
Users and groups
Access rights management
Graphical interface

Document management

The document wrapping concept
Version control (check-in, check-out, revision, iteration)
Metadata: custom attributes, tags
Document templates
Automatic ID generation
Search engine
Build a document structure

Processes, change management

Process editor
Roles, activities and tasks
Relaunch a stopped process
Monitor the progress of tasks
Change notification

Product data management

Design of the product structure
Variants: substitute links and alternate parts
Configuration definition
Capture part versions (Baseline)
Effectivity based on dates, lots or serial numbers
Product Breakdown Structure and BOM

Instances of products

Digital Mock-Up

3D visualization of products and parts
Search and navigate through the product structure
Selection of the configuration context
Layers and markers
Export a part's 3D view

Collaborate

The presence menu
Chat and video-conference functions
Create collaborative sessions
Share documents, parts
Permanent links
Work with external users

Connection with third-party tools

DocDokuPLM with CAD tools
Connect with office suites
DPLM software
Command Line Interface

DocDokuPLM users
